

# Payroll Exercise

## Requirements (each will need many tests)

- Salaried employees are paid on the last day of the month, according to their monthly salary
- Hourly employees are paid every Friday, according to their hourly rate and hours worked
- Commissioned employees are paid on the 15th and the last day of the month, according to their sales and commission rate

## Your pairing partner

- Understands everything about the language and libraries
- If you can precisely articulate your intent, your pairing partner can help you with the syntax
- Can explain anything about how the code is, but not how the code should be
- Is not much help when it comes to design, you will have to take the lead on this

## Getting Started

- Start out by having a look at the PayrollServiceTest
